EXPERIENCE

BridgeNext, Toronto— *Full Stack Developer*

OCTOBER 2023 - PRESENT

- Collaborated in a team to optimize microservices, directly engaging with clients to resolve critical issues and streamline their objectives.
- Utilized React, NestJS, Apollo GraphQL, and Postgres in full-stack development projects, contributing to robust and scalable software solutions.
- Utilize NewRelic and Lens for effective monitoring of Kubernetes infrastructure, optimizing system performance.
- Developed a dynamic dictionary service for real-time environment variable updates, boosting system adaptability and simplifying configurations.
- Oversee deployment processes to UAT and production, ensuring timely and specification-compliant releases.
- Streamline issue resolution processes, improving system reliability and aligning with client service level agreements.

KPMG, Toronto— *Software Engineer Consultant*

MAY 2022 - JUNE 2023

- Developed software to support projects, ensuring all users were trained in its optimal use.
- Developed efficient code that conforms to coding standards to safeguard efficiency and reliability.
- Monitored and maintained production codebases and development versions to ensure code quality.
- Communicated with clients and internal/external team members to convey goals and requests.
- Utilized pipelines and associated tools to maintain consistent uptime and delivery.
