WORK EXPERIENCE

Bridgenext

Full Stack Developer

October 2023 – November 2024

Canada-Remote

- Contributed to a large-scale robust microservice solution for a logistics client.
- Collaborated in a team to optimize microservices, while directly engaging with clients to resolve critical issues and streamline their objectives.
- Spearheaded the development of a dynamic dictionary service using NodeJS, React, and PostgresDB for real-time environment variable updates, boosting system adaptability and simplifying configurations.
- Consistently assisted with resolving High Priority Incidents in a timely manner to maintain uptime that conforms to the Service Level Agreement.
- Routinely assisted with the deployment of new services to both internal and client environments, ensuring timely and efficient releases.
- Onboarded and trained multiple engineers to be familiar with internal and client-specific tools, solutions, and best practices, facilitating a seamless and efficient transition into their roles.
- Maintained and improved APIs through GraphQL and NodeJS to optimize backend queries and mutations.
- Utilized advanced monitoring and dashboarding tools within Kubernetes to proactively optimize system performance and swiftly address and resolve issues.
- Developed comprehensive testing suites using Jest to validate functionality and ensure the stability of current features and future updates.
- Contributed to the migration from a legacy Ruby on Rails system to a modern, in-house developed solution, ensuring a seamless transition and improved system performance.

KPMG

Software Engineer Consultant

May 2022 – June 2023

Toronto, ON/Remote

- Contributed to the end-to-end development of an e-commerce platform, utilizing ReactJS, NodeJS, and SQL for a robust and scalable software stack.
- Utilized monitoring tools to ensure server uptime and proactively identify potential issues during development and post-deployment phases, ensuring reliability and performance.
- Collaborated with cross-functional internal teams and client stakeholders to gather requirements and key insights, ensuring the efficient and timely development and deployment of the solution.

SKILLS

- Languages: Typescript, Javascript, HTML, CSS, SQL
- Frameworks: NodeJS, ReactJS, GraphQL, NestJS, AngularJS, Ruby On Rails, ExpressJS, Firebase, TypeORM, Bootstrap

EDUCATION

George Brown College

Computer Science

September 2019 – May 2022

Toronto, ON
